

WEEK 1

Aim

To create an ATS-friendly resume webpage using basic HTML elements.

Description

This experiment demonstrates the creation of a structured resume using basic HTML. The webpage includes personal details, contact information, career objective, educational qualifications, technical skills, projects, strengths, languages known, and declaration. HTML elements such as headings, paragraphs, lists, tables, images, and horizontal lines are used to organize the resume.

Details About Program

Saved in: Week 1 folder of the repository.

File used: HTML file with an image stored in the images folder.

Technology used: HTML.

Execution: The HTML file is opened in a web browser.

Working: Basic HTML elements are used to create and organize different sections of the resume. Tables are used for contact, education, and project details, while lists are used for technical skills, strengths, and languages.

Output

The resume webpage displays the personal information, educational details, technical skills, project details, strengths, languages, and declaration in a structured format.

Result

The ATS-friendly resume webpage was successfully created using basic HTML elements and displayed in a web browser.
